FY2023 Q2 Results & FY 2023 Forecast

November 10, 2023

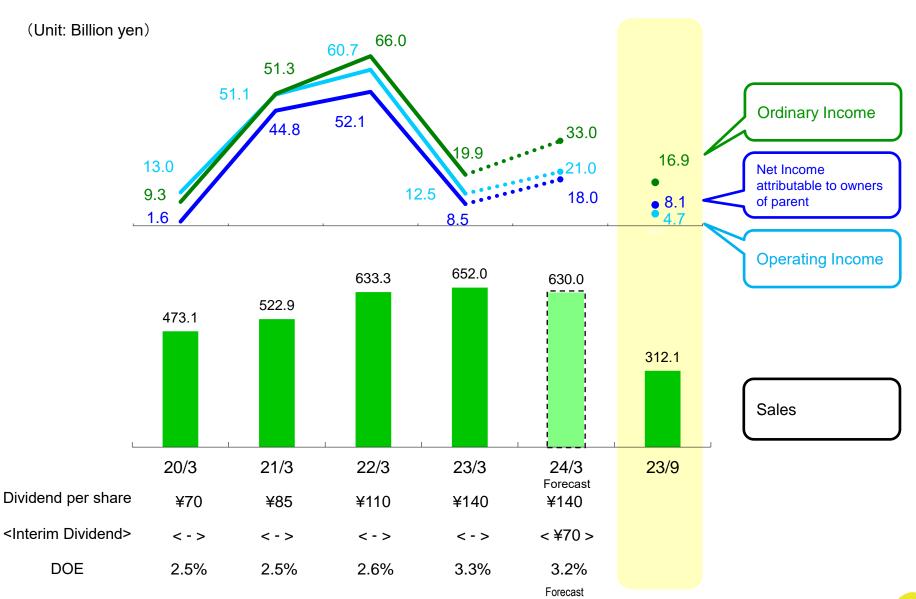

## Results of FY2023 Q2

- FY2023 1st half YoY: Sales decreased due to lower sales volumes in the Engineered Materials segment, such as MicroThin™, and lower metal and precious metal prices.
   In addition to the above, higher energy costs and inventory factors associated with lower metal and precious metal prices led to a decrease in profit.
- As for the FY2023 forecast, sales volumes in the Engineered Materials segment will decrease compared to the previous forecast, but sales are expected to increase due to the weaker yen and increased sales volume in the Mobility segment.
   In addition to the above, operating income, ordinary income, and net income are expected to increase due to improvements in inventory factors and other factors.
