NEWS RELEASE

Launch of Website to Recruit Co-Creation Partners to Develop New Applications for Copper Foil Business

Mitsui Mining & Smelting Co., Ltd. (“Mitsui Kinzoku”) is proud to announce the launch of a new website to recruit co-creation partners for developing new applications for its Copper Foil Division

The newly launched website features the key message “Beyond together.” Through this website, Mitsui Kinzoku hopes to receive offers and recruit partners who will work together to create new markets for the copper foil technologies that Mitsui Kinzoku has cultivated over more than 50 years in the industry, and make those technologies more widely known among customers in other fields, in addition to the printed wiring board field where its products are currently used.

The website introduces the various technologies that are our strengths, along with examples of their use. More detailed information is also available in the downloadable materials. If you are interested in co-creation opportunities with our copper foil business, please contact us via the contact form on the website.

We will contribute to the realization of a sustainable society by implementing our vision for 2030, “Building new businesses — and the future— with our material intelligence,” based on our purpose, “We promote the well-being of the world through a spirit of exploration and diverse technologies.”
